# Services

At STAT Courier, we take pride in delivering what's important to our clients. For health plans, laboratories, hospitals, or other healthcare facilities that need to move time-sensitive specimens, newborn screenings and medical equipment successfully and cost effectively, we offer reliable medical logistics management solutions. Our partners look to us for solutions when they are frustrated with the lack of options for transferring laboratory specimens from one site to another in a way that is reliable, cost-effective—all while maintaining specimen integrity.

Our logistics management solutions include a full range of services, from scheduled to on-demand service, expedited deliveries, and same-day deliveries. Customized solutions include logistics and routing to all of your locations, barcoding, and real-time tracking. Through specialized scheduling coordination, we strive to reduce transit delivery time, saving you time and money while providing you and your customers peace of mind. Beyond the medical industry, STAT also specializes in other logistical delivery solutions, that can be customized to your needs.

# New Technology Partnership

At STAT Courier, we're in constant pursuit of innovations and enhancements that will improve our clients' experience. After extensive research and testing, we are excited to announce a new partnership with Xcelerator, a technology provider whose sole focus is the courier industry. This software offers an improved user experience, extensive reporting and analytical capabilities, and easy-to-use tracking and monitoring tools. Additionally, Xcelerator offers comprehensive integration functionality so we can automatically transfer data to and from customers' systems, eliminating the need for manual data entry.
